This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

BOOKS AND ARTICLES

ON

CLIMATOLOGY AND METEOROLOGY

IN THE

LIBRARY

OF THE

SURGEON-GENERAL'S OFFICE,

UNITED STATES ARMY.

Extract from the Index Catalogue

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1888.

MAY 13 1889

Metcalf (John George). The physiology of the skin. A lecture. 23 pp. 8°. *Boston, Marsh, Capen & Co.*, 1840. [P., v. 751.]

———. The study and practice of midwifery; a discourse read before the Massachusetts Medical Society. 123 pp. 8°. *Boston, J. Wilson & Son*, 1856.

Metcalf (Theodore) & Co. Notes on new remedies, collated from medical and pharmaceutical periodicals, etc. 32 pp. 16°. *Boston*, 1877.

Metcalf (Urbane). The interior of Bethlehem Hospital, humbly addressed to his royal highness the Duke of Sussex, and to the other governors. 16 pp. 8°. *London, the author*, [1818].

Metcalf (*Volney*) [1804–52].

Magoun (C. S.) Biographical sketch of the late Volney Metcalf, M. D., Natchez, Miss. N. Orl. M. & S. J., 1852–3, ix, 484–487.

Metcalfe (Joannes). * De rheumatismo acuto. 2 p. l., 36 pp. 8°. *Edinburgi, A. Smellie*, 1798. [*Also, in:* P., v. 8.]

Metcalfe (John T.)

See **United States** Sanitary Commission. Publications. P. On the subject of the nature and treatment of miasmatic fevers. 8°. *New York*, 1862. ———. The same. Q. On the subject of the nature and treatment of yellow fever. 8°. *New York*, 1862.

Metcalfe (Joseph). Memoir of the Rev. Wm. Metcalfe, M. D. 38 pp. 8°. *Philadelphia, J. L. Capen*, 1866.

Metcalfe (Richard). Medical opinions on the efficacy of hydropathy and the Turkish bath, with Lord Lytton's experiences of the water cure. xxxvi, xvi pp. 8°. *London, R. Metcalfe*, [1869].

———. Sanitas sanitatum et omnia sanitas. v. 1. xx, 334 pp., 1 pl. 8°. *London*, 1877.

Metcalfe (Samuel L.) [1798–1856]. A new theory of terrestrial magnetism. v, 6–158 pp. 8°. *New York, G. & C. & H. Carvill*, 1833.

———. Caloric; its mechanical, chemical and vital agencies in the phenomena of nature. v. 1–2. xxiv, 17–630; viii, 9–481 pp. 8°. *Philadelphia, J. B. Lippincott & Co.*, 1859.

Metcalfe (William) [1788–1862].

Co-Editor of: **American** (The) Vegetarian and Health Journal, Philadelphia, 1850–54.

For Biography, see **Metcalfe** (J.) Memoir of the Rev. Wm. Metcalfe, M. D., [etc.] 8°. *Philadelphia*, 1866.

Metelercamp Cappenberg (Martinus Carolus). * De morbis placentæ universim, et de placuntitide ejusque sequelis in specie. 2 p. l., 36 pp., 2 l. 8°. *Groningæ, P. van Zweeden*, [1844].

Metelerkamp (Rutger). * De pœnis criminum ingeniis populorum accommodandis. 1 p. l., 55 pp., 3 l. 4°. *Lugd. Bat., S. et J. Luchtmans*, 1792. [P., v. 1012.]

Méténier (Jacques). * Des fièvres intermittentes. 35 pp. 4°. *Paris*, 1857, No. 19, v. 608.

Meteorism.

See **Flatulence**, *etc.*

Meteorology.

See, also, **Air**; **Aurora** *borealis*; **Barometer**; **Climate**; **Dew**; **Hygrometer**; **Instruments** (*Optical, etc.*); **Ozone**.

ABDILL (D.) A new theory of the weather, and practical views on astronomy. With a description of the constellations from Dick, Barritt, and others. Also a new and important mode of calculating the weather, and a general view of the atmosphere, and formation of clouds, rain, snow, frost, dew, etc., accompanied with a dictionary of philosophical terms. 8°. *Wheeling*, 1842.

ADIE (J.) On meteorological observations. 8°. [*Edinburgh*, 1831.]

Repr. from: Quart. J. Agric., May, 1831.

ARGENTINE REPUBLIC. Anales de la oficina meteorológica argentina por su director, Benjamin A. Gould. Tomo II. Climas de Bahia y corrientes. 4°. *Buenos Aires*, 1881.

AUFRUF zur Bildung eines Vereines für landwirthschaftliche Wetterkunde. Gerichtet an die landwirthschaftlichen Vereine der Provinz Sachsen, des Herzogthums Braunschweig, des Herzogthums Anhalt und der sächsischen Herzogthümer. 8°. *Magdeburg*, 1881.

BACON (F.) Historia naturalis et experimentalis de ventis. 16°. *Lugd. Bat.*, 1648.

BARDILI (C. G.) * Diss. philos. continens observatione et explicationes quasdam physicas præsertim meteorologicas. 4°. *Tubingæ*, 1780.

BARTHA (C.) * De meteorologia cosmica. 8°. *Budæ*, [1834].

Hungarian text.

BAUER (J. B.) * De aëris constitutionibus ad formandas indicationes rite æstimandis. 8°. *Landishuti*, 1815.

BECKER (J.) * De grandine. 4°. [*Lipsiæ*, 1659.]

BELOST (S.) * Considérations sur les quatre principaux états de l'atmosphère, ou sur le chaud, le froid, le sec et l'humide. 4°. *Paris, an XII* [1804].

BENKÖ (S.) Ephemerides meteorologico-medicæ, ab ann. 1780 ad ann. 1793. 5 v. 8°. *Vindobonæ*, 1794.

BENT (S.) An address delivered before the St. Louis Historical Society upon the thermometric gateways to the pole, surface currents of the ocean, and the influence of the latter upon the climate of the world. 8°. *St. Louis*, 1869.

BLASIUS (W.) Storms; their nature, classification, and laws. With the means of predicting them by their embodiments, the clouds. 8°. *Philadelphia*, [*n. d.*]

BRANDIN (A. V.) Observaciones meteorológicas. 8°. [*n. p.*, 1827.]

Repr. from: Anales méd. de Perú, 1827.

BRAUN (J. A.) Oratio academica de atmosphæræ mutationibus præcipuis, earumque præsagiis. 4°. *Petropoli*, 1759.

BRITISH Meteorological Society. Proceedings, 1862–71. Edited by J. Glaisher. 5 v. 8°. *London*, 1863–71.

BRUNING (J. H. L.) * De caussis grandinum nocturnis horis decidentium. 4°. [*Hafniæ*, 1755.]

BUCHAN (A.) A handy book of meteorology. 8°. *Edinburgh & London*, 1867.

———. Introductory text-book of meteorology. 8°. *Edinburgh & London*, 1871.

CANADA. *Meteorological service.* Monthly Weather Review, for the months of Dec., 1886, Jan., March, 1887. 4°. [*Toronto*, 1887.]

———. Toronto Meteorological Register for the year 1886. 8°. [*Toronto*, 1887.]

CLOUSTON (C.) An explanation of the popular weather prognostics of Scotland on scientific principles. 8°. *Edinburgh*, 1867.

COCK (W.) Meteorologia, oder Witterungs-Lehre, in welcher der rechte Weg, die Veränderungen der Luft und Abwechselungen des Wetters, in unterschiedenen Ländern, vorher zu erkennen. Aus dem Englischen. Von J. M. Glaschke. 4°. *Würzburg*, 1729.

COFFIN (J. H.) Winds of the northern hemisphere. 4°. 1850. Revised 1852. *Washington, D. C.*, 1853.

———. Psychrometrical table, for determining the elastic force of aqueous vapor and the relative humidity of the atmosphere from indications of the wet and dry bulb thermometer. 8°. *Washington*, 1860.

———. The winds of the globe . . . completed . . . by S. J. Coffin; with a discussion and analy-

Meteorology.

sis of the tables and charts by A. Woeikof. 4°. *Washington City*, 1875.

CONGRÈS international de météorologie, tenu à Paris du 24 au 28 août 1878. 8°. *Paris*, 1879.

D'ALEMBERT. Réflexions sur la cause générale des vents. Le même sujet en texte latin: Meditationes de generali ventorum causa. sm. 4°. *Paris*, 1747.

D[ALENCÉ]. Traittez des baromètres, thermomètres, et notiomètres, ou hygromètres. 12°. *Amsterdam*, 1688.

———. The same. Abhandlung dreyer so nothwendig- als nützlichen Instrumenten, nemlich des Barometri, Thermometri und Notiometri oder Hygrometri . . . Ins Teutsche vorgetragen von D. M. H. C. J. sm. 4°. *Mäyntz*, 1688.

DANIELL (J. F.) Meteorological essays and observations. 2. ed. 8°. *London*, 1827.

DAUMIUS (C. L.) De tempestatum varietate et investigandis veris ejusdem rationibus una cum observationibus barometricis et meteorologicis. 4°. *Vittembergæ Saxonum*, [1714].

DAVID (A.) Ursachen und Vorschriften, warum und wie die Witterungs-Beobachtungen anzustellen sind. 8°. *Prag*, 1817.

DAVY (H.-M.) Météorologie. Les mouvements de l'atmosphère et des mers considérés au point de vue de la prévision du temps. 8°. *Paris*, 1866.

DRECHSLER (A.) Das Wetterglas. Vademecum der Witterungskunde. 16°. *Leipzig*, 1867.

DREW (J.) Practical meteorology. Edited by F. Drew. 2. ed. 12°. *London*, 1860.

DU BOULAY (T.) The summer of 1862: founded on the vernal equinox. With observations on the summers of England, coupled with remarks on the locality and meteorology of Great Britain. 8°. *London*, 1862.

———. The summer of 1865: founded on the vernal equinox. 8°. *London*, 1865.

DU CREST (M.) Kleine Schriften von den Thermometern und Barometern. Aus dem Französischen übersetzt und mit einigen Anmerkungen begleitet von J. C. Thenn. 8°. *Augsburg*, 1770.

EISENLOHR (O.) Untersuchungen über den Zusammenhang des Barometerstandes mit der Witterung im Winter. 8°. *Karlsruhe*, 1852.

ESPY (J. P.) The philosophy of storms. 8°. *Boston*, 1841.

———. First report on meteorology made to the Surgeon-General, United States Army. fol. *Washington*, 1843.

———. Second and fourth reports on meteorology made to the Secretary of the Navy. 2 v. 4°. *Washington*, 1850 & 1857.

EXNER (C.) *De pluvia. sm. 4°. *Lipsiæ*, [1648].

FITZROY (R.) The weather book. A manual of practical meteorology. 8°. *London*, 1863.

———. Barometer manual, 1863. 8. ed. 8°. *London*, 1865.

FLUDD [*or* DE FLUCTIBUS] (R.) Meteorologia cosmica. fol. *Francofurti*, 1626.

DE FONVIELLE (W.) Thunder and lightning. Transl. from the French, and edited by T. L. Phipson. 12°. *London*, 1868.

FORCE (P.) Record of auroral phenomena observed in the higher northern latitudes. (Appendix.) 4°. *Washington, D. C.*, 1856.

FORGET (C.-P.) De l'utilité des observations météorologiques. 8°. [*Paris*, 1854.]

FORRY (S.) The climate of the United States and its endemic influences. Based chiefly on the records of the Medical Department and Adjutant-General's Office, United States Army. 2. ed. 8°. *New York*, 1842.

Meteorology.

FORSTER (T.) Researches about atmospheric phænomena. 3. ed., to which is added the calendar of nature. 8°. *London*, 1823.

FORSTER (T. F.) The pocket encyclopædia of natural phenomena; being a compendium of prognostications of the weather, signs of the seasons . . . compiled principally from the manuscripts and MS. journals of the late T. F. Forster. By T. Forster. 8°. *London*, 1827.

[FRADESSO.] Wiener Meteorologen Congress, 1873. 8°. [*Vienne*, 1873.]

FRITSCH (G.) *De rore microcosmi. sm. 4°. *Lipsiæ*, [1665].

FROBESIUS (J. N.) Nova et antiqua luminis atque auroræ borealis spectacula. Secundum sæculorum atque annorum seriem subnexa mirabilis phænomeni consideratione philosophica. 4°. *Helmstadii*, 1739.

FROELICH (O.) *Ueber den Einfluss der Absorption der Sonnenwärme in der Atmosphäre auf die Temperatur der Erde. 4°. *Königsberg*, [1868].

FROMONDUS (L.) Meteorologicorum libri sex. 4°. *Antverpiæ*, 1627.

FUESS (R.) Neue registrirende meteorologische Apparate. 4°. *Berlin*, 1883.

Repr. from: Ztschr. f. Instrumentenkunde, June, 1883.

FUNCCIUS (C.) De pluvia; aphorismi physici. 4°. *Lipsiæ*, [1647].

FUNCCIUS (J. C.) De coloribus cœli in genere. 4°. *Lipsiæ*, [1705].

GERMANY. Ergebnisse der Beobachtungsstationen an den deutschen Küsten über die physikalischen Eigenschaften der Ostsee und Nordsee und die Fischerei. Veröffentlicht von der Ministerial-Kommission zur Untersuchung der deutschen Meere in Kiel. Hft. 9 u. 10, Sept. u. Oct. 1873. 4°. *Berlin*, 1874.

GIESWALD (H.) Lehre von der Thermometrie, der Pyrometrie, Hygrometrie, Psychometrie und Barometrie in ihrer Gesammtheit dargestellt, und nach den Quellen, namentlich auch zum Gebrauch für Techniker bearbeitet. Nebst einem Anhange mit praktischen Erläuterungen. sm. 8°. *Weimar*, 1861.

GILBY (G. H.) *De mutationibus quas ea quæ e terra gignuntur aëri inferunt. 8°. *Edinburgi*, 1815.

GIRONDE (Département de la). Commission météorologique de la Gironde. Observations pluviométriques et thermométriques faites dans le département de la Gironde de 1883–4 et 1884–5. Notes de M. Rayet. Rapports sur les orages de 1883 et 1884 par M. Lespiault. 8°. *Bordeaux*, 1884–5.

GLAISHER (J.) Hygrometrical tables; containing the temperature of the dew-point, the elastic force and weight of vapour; degree of humidity; weight of air, corresponding to all readings of the dry and wet thermometers, between 10° and 90° of Fahrenheit. 8°. *London*, 1847.

———. Meteorological essays; being cuttings from the Proceedings of the Meteorological Society of London, from 1861 to 1869. 1 v. 8°. [*n. p., n. d.*]

GLAISHER (J.) [*et al.*]. Travels in the air. Edited by J. Glaisher, F. R. S. 8°. *Philadelphia*, 1871.

GLÖCKNER (J. F.) *De pondere nubium. 4°. *Halæ Magdeb.*, [1722].

GREAT BRITAIN. *Army.* Observations made at the magnetical and meteorological observatory at St. Helena, with discussions of the observations at St. Helena, the Cape of Good Hope, the Falkland Islands, Carlton Fort in North America, and Pekin. Printed by order

Meteorology.

of her majesty's government under the superintendence of Major-General Edward Sabine. v. 2, 1844-9. 4°. *London*, 1860.

GUYOT (A.) Tables, meteorological and physical, prepared for the Smithsonian Institution. 3. ed. 8°. *Washington*, 1859.

———. The same. 4. ed., revised and enlarged. Edited by William Libbey, jr. 8°. *Washington*, 1884.

HALLMANN (E.) Die Temperaturverhältnisse der Quellen. Eine meteorologische Untersuchung. 2 v. 8°. *Berlin*, 1854-5.

HANN (J.) Untersuchungen über die Veränderlichkeit der Tagestemperatur. 8°. *Wien*, [1875].

Repr. from: Sitzungsb. d. k. Akad. d. Wissensch. Math.-naturw. Cl., Wien, 1875, lxxi, 2. Abth.

HARE (R.) A verbal communication, respecting some experiments made by . . . to ascertain the comparative heating or cooling influence of changes of density resulting from changes in pressure in dry air, and air replete with aqueous vapour; also, some experiments favourable to the idea that a vacuum has a capacity for caloric. 8°. [*Philadelphia*, 1840.]

Repr. from: Proc. Am. Phil. Soc., Phila., 1840, i.

———. Objections to Mr. Redfield's theory of storms, with some strictures upon his reasoning. 8°. [*New Haven*, 1841?]

Repr. from: Am. J. Sc. & Arts, N. Haven, 1841-2, xlii.

———. Additional objections to Redfield's theory of storms. 8°. [*New Haven, n. d.*]

Cutting from: Am. J. Sc. & Arts, N. Haven.

———. Queries and strictures respecting Espy's meteorological report to the Naval Department. Also, the conclusions arrived at by a committee of the Academy of Sciences of France, agreeably to which tornadoes are caused by heat; while, agreeably to Peltier's report to the same body, certain insurers had been obliged to pay for a tornado as an electrical storm. With abstracts from Peltier's report. 8°. *Philadelphia*, 1852.

HEJSER (J. D.) * De rigidiore, medio ævo in terris borealibus, hyeme. sm. 4°. *Upsaliæ*, 1795.

HEROS (L.) * De ventis. 8°. *Berolini*, [1846].

HOFMANN (J. G.) * De nive. 4°. *Wittebergæ*, [1665].

HOPKINS (T.) On the atmospheric changes which produce rain, wind, storms, and the fluctuations of the barometer. 8°. *London*, 1844.

———. The same. 2. ed. 8°. *London*, 1854.

HOSKINS (S. E.) Tables for the extemporaneous application of corrections for temperature to barometric observations, deduced from the tables published in the report of the committee of physics, Royal Society. 8°. *Guernsey*, 1842.

HUEBLER (C.) * De pluviis prodigiosis. 4°. *Erfurti*, [1695].

HUNTER (F.) * De ætheribus. 8°. *Edinburgi*, 1808.

JAMES (H.) Instructions for taking meteorological observations; with tables for their correction, and notes on meteorological phenomena. Drawn up by order of the secretary of state for war. 8°. *London*, 1861.

JANUS (F. A.) * Diss. hist.-phys. de pluvia prodigiosa. 4°. *Lipsiæ*, [1667].

JENKINS (T. A.) The barometer, thermometer, hygrometer, and atmospheric appearances at sea and on land as aids in foretelling weather, with brief rules for their use, and the practical application of their separate and combined indications as weather guides. 8°. *Washington*, 1869.

JENNER. Signs of rain. Forty reasons for not accepting the invitation of a friend. The same in Latin by the late J. Latham. 8°. *London*, [*n. d.*]

JUNCKER (F. C.) De tonitru magno sub pluvio personante et mitescente. 4°. *Halæ Magdeb.*, [1752].

KÄMTZ (L. F.) Vorlesungen über Meteorologie. 8°. *Halle*, 1840.

———. Cours complet de météorologie. Trad. et annoté par C. Martins. 8°. *Paris*, 1843.

———. The same. A complete course of meteorology. With notes by C. Martins; and an appendix, containing the graphic representation of the numerical tables by L. Lalanne. Transl., with notes and additions, by C. V. Walker. 8°. *London*, 1845.

KRAFFT (G. W.) Oratio publica, de insoliti caloris æstivi caussa. 4°. *Tubingæ*, 1750.

KUNZEK (A.) Leichtfassliche Darstellung der Meteorologie. 8°. *Wien*, 1847.

LACHLAN (R.) A paper and resolutions in advocacy of the establishment of a uniform system of meteorological observations throughout the whole American continent. 8°. *Cincinnati*, 1859.

LAMBERT (J. H.) Abhandlung von den Barometerhöhen und ihren Veränderungen. 4°. *München*, [*n. d.*]

LANARCK. Mémoire sur le mode de rédiger et de noter les observations météorologiques, à fin d'en obtenir des résultats utiles, et sur les considérations que l'on doit avoir en vue pour cet objet. 4°. [*n. p., n. d.*]

LANDOLT (H.) Neuerungen an Polaristrobometern. 4°. *Berlin*, 1883.

Repr. from: Ztschr. f. Instrumentenkunde, April, 1883.

LATZINA (F.) Sobre meteorolojía. Conferencia popular. 8°. *Córdoba*, 1876.

LEYST (E.) Katalog der meteorologischen Beobachtungen in Russland und Finnland. Vierter Supplementband zum Repertorium für Meteorologie, herausgegeben von der kaiserlichen Academie der Wissenschaften. 4°. *St. Petersburg*, 1887.

LOOMIS (E.) On certain storms in Europe and America. 4°. [*Philadelphia*], 1859.

———. A treatise on meteorology, with a collection of meteorological tables. 8°. *New York*, 1868.

DE LUC (J.-A.) Recherches sur les modifications de l'atmosphère; contenant l'histoire critique du baromètre et du thermomètre, un traité sur la construction de ces instruments, des expériences relatives à leurs usages, et principalement à la mesure des hauteurs et à la correction des réfractions moyennes. 2 v. 4°. *Genève*, 1772.

MERKIUS (H. A.) De ventis, incendi tempore orientibus. 4°. *Lipsiæ*, 1587.

MOHN (H.) Havets Temperatur mellem Island, Skotland og Norge. 8°. [*Christiania*, 1869.]

Repr. from: Særskilt aftrykt af et Foredrag i Videnskab.-Selsk. i Christiania, 1869.

VAN MONS (J. B.) Censura commentarii a Wieglebo nuper editi, cui titulus: De vaporis aquei in aërem conversione. 4°. *Bruxellis*, [*n. d.*]

MORRIS (A. J. T.) A treatise on meteorology; the barometer, thermometer, hygrometer, raingauge, and ozonometer; with rules and regulations to be observed for their correct use. To which are appended some of the latest discoveries and theories of scientific men respecting various solar and terrestrial phenomena. Dedicated to the meteorologists of Strathearn. 12°. *Edinburgh*, 1866.

MÜHRY (A.) Untersuchungen über die Theorie und das allgemeine geographische System der

Meteorology.

Winde. Ein Beitrag zur Begründung einer rationellen Lehre von den Luftströmen, für den Gebrauch der Klimatologie und der Nautik. 8°. *Göttingen*, 1869.

MÜLLER (F.) Considérations sur la prévision des tempêtes et spécialement sur celles du 1er au 4 décembre 1863. Supplément aux Annales de l'Observatoire physique central pour l'année 1861. 4°. *St.-Petersbourg*, 1864.

MÜLLER (J.) Grundriss der Physik und Meteorologie. 5. Aufl. 8°. *Braunschweig*, 1856.

———. The same. Principles of physics and meteorology. 1. Am. ed. 8°. *Philadelphia*, 1848.

NEU-ERFUNDENE mathematische Curiositäten. Enthaltend die wunderbareste Würkungen der Natur und Kunst, worinnen vermittles drey sonderbaren Instrumenten: 1. Die Schwere und Leichte; 2. Die Truckne und Feuchte; 3. Das Ab- und Zunehmen der Hitz und Kälte der Lufft zu beobachten und zu erkennen seynd. Aus dem Frantzösisch in Deutsch übersetzt. 4°. *Mayntz*, 1695.

NEW YORK (City). *Department of Public Parks.* Annual reports of the director of the New York Meteorological Observatory, Central Park, for the years 1870–71; 1873–5; 1877; 1886. 8°. *New York*, 1871–87.

———. Abstract of registers from self-recording instruments. Jan., 1879, to Dec., 1881; July, 1882; Jan. to July, 1886. 4°. [*New York*, 1879–86.]

———. New York Meteorological Observatory, Central Park. Annual tables for the years 1879–81. 4°. *New York*, 1880–82.

NICOLLET (J. N.) Essay on meteorological observations. Printed by order of the War Department. 8°. [*Washington*], 1839.

NOTH (J. T.) *Specimen physicum de pluvia et tonitru quo simul locus Job. xxxviii, 25. 26. 27. explicatur. 4°. *Wittebergæ*, [1787].

NOYES (I. P.) How to be weather-wise. A new view of our weather system. 12°. *New York*, [1882].

OBSERVATORIO-FÍSICO-METEOROLÓGICO de la Habana. [Resúmen. Enero á julio, setiembre á diciembre 1875; enero, marzo á mayo, julio, setiembre, noviembre 1876; julio, agosto 1878.] 4°. [*Habana*, 1875–8.]

———. En la Escuela professional de la isla de Cuba. Observaciones [diario] desde 1° de enero de 1875 á 30 de noviembre de 1878. 4°. [*Habana*, 1875–8.]

OTAGO (Province of). Geological Survey Office. Meteorological observations. April, Aug., 1863. broadside. [*Dunedin*, 1863.]

OLMSTED (D.) On the recent secular period of the aurora borealis. 4°. [*Washington*], 1856.

PEUSCHELIUS (J. F.) De ventis. 4°. *Jenæ*, 1667.

PFAFF (C. H.) Ueber den heissen Sommer von 1811, nebst einigen Bemerkungen über frühere heisse Sommer. Eine academische Gelegenheitsschrift bei Niederlegung seines von Johannis 1810 bis Johannis 1811 geführten Decanats der medicinischen Facultät. 8°. *Kiel*, 1812.

PICKETT (J. C.) Thermopsis. The hot weather. 8°. [*Washington*, 1866.]

PLANERUS (J. A.) *De nive. II. Respondens C. Schmeltzer. 4°. *Vittembergæ*, [1695].

———. The same. III. Respondens W. H. Leubius. 4°. *Vitembergæ*, [1696].

———. The same. IV. Respondens B. Siberus. 4°. *Vitembergæ*, [1696].

POINTER (J.) A rational account of the weather. Shewing the signs of its several changes and alterations, together with the philosophical reasons of them . . . To which are added three essays towards accounting for: I. A continued course of wet years. II. The cause of an aurora borealis. III. The cause of the plague. 2. ed. 8°. *London*, 1738.

[PORTUGAL.] Notas explicativas (instrucções) para compor os extractos do Diario nautico conforme o plano approvado e recommendado pela conferencia maritima de Bruxellas. 8°. *Lisboa*, 1854.
